AUG 2018 - DEC 2022

Final GPA: 3.25

SKILLS

Familiar with the languages HTML, CSS, Python, and Ruby.

PROJECTS

ASLA Tracker

Contributor

- Developed website using Ruby on Rails to handle member and administrator functionalities for the Texas A&M chapter of the American Society of Landscape Architects.
- Used the Scrum Agile methodology to integrate customer feedback throughout development.
- Implemented consistent, responsive styling throughout the website that was easy tailored to the goals of the customer.
- Used integration, unit, and acceptance testing to create robust, satisfactory code for the customer and users.

HackerTrackers

Contributor

- Developed a website using Python, Flask, React, and Node to recursively track wallets involved in suspicious transfers on the Solana network and add them to a database.
- Created algorithm for conducting the forward search of suspicious accounts and collecting necessary metadata.
- Created API that queries database and find if a wallet address was marked suspicious or can also return a list of all suspicious wallet addresses.

WORK EXPERIENCE

US Med-Equip, Houston, TX – *Warehouse Employee*

JUNE 17, 2019 – AUGUST 16, 2019

- Improved efficiency: I organized warehouse merchandise to decrease the time needed to find items and to transport items to other locations.
- Maintained a clean and organized workspace: I took initiative to keep the warehouse clean and dispose of old equipment to improve the overall work environment.
- Trained a new employee: I was responsible for training a new hire on warehouse procedures and best practices, to improve the success of the team.
